Policy
09.0 Information Protection Processes and Procedures (PR.IP)
   09.1 PR.IP-1
       09.1.1 Configuration Management

Purpose
Identify supported server operating systems

Scope
IOT Supported Entities

Statement
Current versions of supported server operating systems are as follows:

- Windows Server 2008
- Windows Server 2008 R2
- Windows Server 2012 R2
- Windows Server 2016
- RedHat Enterprise 6.5
- RedHat Enterprise 7.0

Roles
Information Asset Owners/System Owners

Responsibilities
Information Asset Owner/Systems owners shall understand and use only approved Operating Systems.

Management Commitment
Management shall ensure only supported operating systems are used.

Coordination Among Organizational Entities
Agencies shall coordinate with IOT when replacing or building new applications and confirm the supportability on the approved list of operating systems.
Compliance
IOT shall review every operating system.

Exceptions
Exceptions will be handled on a case by case basis through the Director of Risk & Compliance, State CISO and the IOT Operations Team.
